I checked after each case and think most of the puzzles were a little too easy although I admit that I didn't always think of ALL of the reasons for my correct answer so I did learn some things. \*ARC from NetGalley\*

60-Second Brain Teasers Crime Puzzles: Short Forensic Mysteries to Challenge Your Inner Amateur Detective | Review on Reader Fox Blog | I've always been a huge fan of puzzles and brain teasers. Whether because the answer is too simple you find yourself second-guessing whether it could possibly be correct or you're just not picking up on something these puzzles will probably take more than 60 seconds. the entertainment factor Okay so despite my complaints this book was actually a lot of fun? I was definitely looking for something else when I picked it up but I did genuinely find several of the puzzles engaging and entertaining. I am certainly not suggesting that writers plagiarize the included vignettes (for one thing the author's a lawyer!) but they do provide a good source to see how relatively simple ideas can be built into longer fiction.

60-Second Brain Teasers Crime Puzzles: Short Forensic Mysteries to Challenge Your Inner Amateur Detective i received a copy of this book via NetGalley in exchange of a honest review so here it goes. I spend part of the morning and the majority of the afternoon reading these 'cases' out loud trying to get my mom engaged but we just couldn't care enough: the cases are just TOO basic and simple or too incoherent to the point where the 'solutions' are just more info in most of cases. That way in at least two instances girls were being stalked by a man and: the first one a 20 years old tell her friend her boyfriend is stalking him and getting violent (shows bruises which yeah lack of vitamin and heart problems or whatever he didn't need to touch her ok?) and the second one is actively being followed and that is clearly stated by the case but the moment she asks for her brother to stay on the phone while she enters her house the author claims "she knew she sounded like a total idiot" and NO YOU DON'T SOUND LIKE AN IDIOT FOR BEING SCARED OF A MAN WHO IS FOLLOWING YOU AROUND and breaking and entering into your home.

With the user solving a handful at a time in order to spend a few relaxing moments used to tax the brain, They could be used in today's difficult environment via video or audio chat with friends or family, Students could be given these by their teachers to work on critical thinking skills: I love things like this and hope to see more quizzes in this format in the future: Short forensic mysteries.

Normally around 2 pages to challenge the reader to answer the question at the end of the mystery, 65 puzzles to solve with the answers at the back of the book: Unfortunately I found the puzzles either too obvious or a total guess and would have preferred more of a riddle to try and work the answer out, Great idea and sure that in the right setting could have a lot of fun but didn't quite achieve what I was looking for: Reading the book on a kindle I also struggled to go back and forth to the answer page but maybe that was just my lack of technique: In general I found the book a little tiresome to read and quickly got fed up due to the cases not being challenging enough: I would like to thank both NetGalley and Quarto Publishing Group - Fair Winds for supplying a copy of this book in exchange for an honest review: 60-Second Brain Teasers Crime Puzzles: Short Forensic Mysteries to Challenge Your Inner Amateur Detective I didn't love this one.

Just not quite as fun as I'd hoped. I was provided a free copy of this book via NetGalley in exchange for an honest review, You will get a chance to listen to testimonials of experts and evaluate gory details in order to help solve the crime, Some are very easy and others need more speculation in order to figure out what happened. I think the physical book would be easier than the ebook version in order to get to the back of the book where the answers are, I would like to thank NetGalley and Quarto Publishing Group - Fair Winds for a free copy for an honest review: 60-Second Brain Teasers Crime Puzzles: Short Forensic Mysteries to Challenge Your Inner Amateur Detective Originally published on my blog: Nonstop Reader, 60-Second Brain Teasers Crime Puzzles is a collection of short vignette brain teaser mysteries by Diane Capri (aka M, Due out 15th Sept 2020 from Quarto on their Fair Winds imprint.

3: Diane Vogt is a book of short "crimes" that the reader has to solve: First let me thank NetGalley the publisher Quarto Publishing/Fair Winds Press and of course the author for providing me with a copy of this book in exchange for an honest review, I grew up loving puzzles and logic problems so this idea of solving a crime really appealed to me: You read each case which is only about a page or so long and then using logic you answer the question at the bottom. It helps if you are familiar with mystery novels and crime shows on television: Apparently I know a lot more about DNA and forensics than I thought I did: Most of the puzzles are very straight-forward (maybe too much so) but the answers are all at the back so you can check after you think you've figured out the answer: Now what I wouldn't recommend is to sit and answer them all at once, After about a dozen in a row I found myself a little bored: Just like a crossword puzzle book you don't sit down and do them non-stop. I used Adobe Digital Editions on my laptop to read these where I could more easily bookmark the puzzles and solutions so that I could quickly go back and forth: I think it would be a little more difficult on my e-reader. Anyway it was a fun book to read but I wish it had been a little more challenging or had different levels of puzzles: For a more complete review of this book and others

Readers are to read each teaser and deduce the single question at the end, What is more is that when you look at the answer key some of the answers suggest quite a bit of speculation that would be needed to come up with the solution: Even some of the most obvious solutions tended to offer unusual details that could not be gleaned from the teaser, Actually some of the responses provided extra clues difficult to glean from the teaser: It was honestly just a middle of the road type of book. An original and unique book catering to the crime connoisseurs out there, Fun simple and relatively lighthearted this is a book I thoroughly enjoyed and one that can be dipped in and out of whenever the feeling takes you. Recommended to those with an interest in crime-solving techniques crime fiction and true crime cases and/or those seeking something different to tax the brain a little. As the chief crime scene investigator you must correctly determine the answer to the question at the end of each of the 65 crime stories inside the book, Each of the crime stories will test your knowledge of DNA analysis suspect identification forensic pathology toxicology and more. Gerade wenn man gerne Krimis liest kann man ja auch mal Spaß dran haben das Lösen der kleinen Geschichten selbst in die Hand zu nehmen: Die erste Story bietet so eine Art Aufgalopp ein wenig wie in der Schule wo man auch schauen musste was der Lehrer wohl von einem wollte. Hat man das Prinzip kapiert lohnt es sich aufmerksam zu lesen: Dann wird man fröhlich feststellen dass man zwar kein ganz gewitzter Detektiv ist aber ein bisschen schon: Dann ahnt man wer die Frau getötet hat wer es war wer es nicht war oder auch wie das zu beweisen war: Natürlich liegt man manchmal falsch oder einem fällt eben nichts ein. Vielleicht eignet sich das Buch auch für einen Gruppenabend an dem man dann gemeinsam rätseln und diskutieren kann: Beim ersten Lesen hat man sogar das Privileg die verschlossenen Seiten öffnen zu dürfen, Nicht mogeln!Auch die Aufmachung des Buches mit seinem auffälligen Cover und den verschlossenen Seiten den sorgfältig ausgewählten Bildern und auch dem sonstigen Layout ist sehr ansprechend, Ein toller Zeitvertreib der neben dem Lesen auch die Möglichkeit der aktiven Teilnahme an den Geschichten bietet: Vielleicht sollte man so etwas häufiger lesen damit man bei den Romanen noch besser miträtseln kann. My curiosity was piqued when I came across Crime Puzzles: Short Forensic Mysteries to Challenge Your Inner Amateur Detective, Diane Vogt this was certainly an intriguing collection though I think 60 seconds is a bit of an exaggeration. What can you deduce?As much as I adore puzzles I don't personally feel like these were very puzzle-esque, Sure you have to figure out the answer to the question and determine based on minimal knowledge what occurred: But at the same time much of it relies on outside background information that not everyone may have: Not only that but there's not really much puzzling going on at least in the way I would like: You're really just presented with a scenario and prompted to answer a question, It's not like the kind of puzzle you have to work at. Frankly I kind of just felt like any time I was able to determine the answer it was either because the answer was quite obvious or because I'd gotten lucky, I also found myself second-guessing answers often thinking that the simple solution was too simple: Other times the answers were so obscure it just seemed silly: Plus there are some pretty cool pieces of artwork decorating each scenario that I enjoyed well enough, I feel like these puzzles could be enjoyed in a number of circumstances from long car trips and bedtime reading to a party with friends: It's fun it's 128 pages and will be available in paperback format, This is a collection of short vignette style mystery plots for armchair detectives to analyze and answer, There's little puzzling or reasoning involved and as such some readers will be disappointed: The way the book's puzzles struck me were as very short capsule setups for mystery fiction taken more or less directly from a writer's idea journal for future works, The author's solutions are listed in the back of the book so readers won't be left hanging. Rated on a strictly puzzle/brain teaser level I would give this two and a half stars: Looked at as a glimpse at a

published mystery writer's idea book it's a solid 4 stars. This would make a superlative exercise book for creative writing classes and for would-be mystery writers to see the genesis of ideas for fiction, Two and a half stars for the puzzle aspect four for the value as an idea book/writing tool: If the author and publisher had marketed it as such it might have found a wider audience: Disclosure: I received an ARC at no cost from the author/publisher for review purposes, I'm sorry but I don't see who would spend \$13 in this book. If some of these "mysteries" were on the back of the paper maybe I'll entertain myself reading through them; as it is I won't be recommending this book to anyone. Now all of that I can overlook but there were instances when serious topics were badly handled. Cool edition though the fact that the solutions are in the back is difficult for e-readers but I'm not recommending this boring either easy or ridiculous book, 60-Second Brain Teasers Crime Puzzles: Short Forensic Mysteries to Challenge Your Inner Amateur Detective.

.Many thanks to Quarto Publishing Corp. - Fair Winds and to NetGalley for this ARC for review. This is my honest opinion. There are 65 crime stories with questions to answer. All in all.

I found the book interesting. Diane Vogt).5 stars60 Second Brain Teasers Crime Puzzles by M. All opinions are my own.My Synopsis and Opinions:Well this was really interesting. You don't even need a pen and paper. There are 65 cases.Also I did not read this on my e-reader.wordpress. The instructions say that no pencil or paper is necessary. The solutions go from simple to impossible. My correct answers were about 50/50.However some were impossible to guess.Overall this is a very fun book. I can imagine it being used in a number of settings. It could be used singly and I didn't hate it either. Some puzzles were interesting some not so much. It also seemed geared more towards a younger crowd.M. Diane Vogt is an attorney practicing in Tampa Florida. Also writes under the name {site\_link} Diane Capri.M. Few of the puzzles actually left me feeling impressed. They are 1-2 pages in length and set up very simply. It's not a brain teaser book. What on earth. So yeah
